Some of the following data has been quoted from Premier brochures and web site data

Premier Pontoon Boats ... "Often imitated, but never duplicated. Premier continues to lead in patents, industry firsts and leading-edge innovations". The 250 Intrigue is the ideal boat for entertaining and this 250 Intrigue is optioned with the PTX™ triple tube technology!

"THE PTX™ ADVANTAGE ... where performance and handling come together. Premier's PTX™ triple tube technology is unlike anything you've ever experienced in a pontoon. The PTX™ package gives each pontoon unprecedented performance and handling. With our unique PTX™ shaped hull, featuring a flat surface and lifting strakes on the inside of the two outer tubes, you'll experience instantaneous planning and unmatched power and stability. The PTX™ ride is as comfortable as you will find on any boat in the industry, even in choppy water. Whether it's the wake of another craft or white caps on a windy day, the PTX™ cuts through the waves to keep you comfortable and dry. The PTX™ tube improves buoyancy and stability even when the boat is not on plane. See photos for more explanation of the PTX™ Advantage in action.
