Existing safety and mooring equipment  
Existing manuals

The Profisher line of high quality aluminum fishing boats is Manufactured by the Allsea Boat Company, Shandong, China, with a sales and support network spanning 6 continents and 38 countries. Profishers are purpose-designed for the fishing enthusiast and crafted for salt water performance and durability. While the focus is on fishing, the 750F has enough creature comfort features for general recreational use as well.

This Profisher 750F is the full cabin version with a fully enclosed pilothouse and fishing features that include a large livewell, baitwell and 11 rocket launcher-style rod holders. A cockpit bench seat drops down to leave unobstructed space for fishing activities. Cabin floors, cockpit, gunwales and foredeck areas have cushioned anti-slip Eva marine flooring. Additional safety features include a heavy duty bow rail and cabin top handrails.

Profisher's forward cabin provides sleeping accommodations for two, and pilothouse seating can be reconfigured to provide a third bunk if required. An electric toilet makes for comfortable extended outings and if desired, a small galley stove and sink can be added in the pilot house.
