Dockside water inlet

Automatic bilge Pump

CO detector

All existing safety & mooring equipment

**Regal's FasTrac hull is a patented, stepped hull design engineered to improve boat performance. By incorporating a full-beam step mid-ship, it introduces air beneath the hull to reduce drag, allowing for up to 26% faster speeds and 30% greater fuel efficiency than conventional, equally-sized boats. Here's a great video from BoatTest.com showing FasTrac in action... <https://www.youtube.com/watch?v=ky2p-ddlO6c&t=2s>**

**This low-hour, trailerable, 2765 Commodore Express has all the amenities a cruising family will need for comfortable overnight outings. The mid cabin layout will comfortably sleep four adults and offers a full galley plus a head compartment that doubles as a shower. The cockpit has plenty of flexible seating plus a handy refreshment centre with cooler storage. Molded steps lead to a walk-through windshield and a transom gate opens to a large extended swim platform.**
